Industry Verticals Served

Financial Services (Banking & Insurance), Mortgage Banking, Home Building, Non-Profit, Entertainment, Energy & Utilities, Telecommunications

Representative Experiences**Enterprise Architecture and Strategy**

- For a \$2 billion Non-Profit, led Architecture and Integration for Digital Transformation. Defined a nimble and responsive enterprise architecture that captures real-time information on consumer interactions, supports more personalized responses to customer needs, improves customer and partner experience and provides the association with the ability to respond quickly to changing market needs for new products/services. Transformation included moving 80% of the enterprise applications, data platforms and infrastructure services to cloud platforms taking advantage of modern, secure, and scalable environments.

CIO for a Fortune 100 Financial Services company

- Served as the business area CIO for Finance, Risk Management, Investments, Capital Markets, Legal and corporate systems. Managed 400+ team members, over 200 applications and an annual initiative spend of over \$50 million. Built the company's largest loan data mart to forecast investment quality for individual loans and investment portfolios. Led cost reduction and engagement efforts such as an automated legal discovery system that saves \$20 million in legal discovery fees per year and a \$50 dollar technology upgrade to improve employee productivity, reduce downtime and enable new investment products.

Global Technology Leader for a top 5 Global Bank

- Led a global technology delivery organization with 1,200 team members delivering technology services to the bank's 38 lines of business in the United States, Europe and Asia PAC. Built trading floors, in New York, Hong Kong and Charlotte and deployed an international network to support outsourced operations onshore and offshore. Reduced Bank's operational costs by \$50 million by modernizing technology platforms, outsourcing routine operations, and retiring old technologies.
